

Clinical Research Fellowship in Mood and Anxiety Disorders

Applications are invited for a Clinical Research Fellowship at the University of Toronto and the Centre for Addiction and Mental Health (CAMH) in the field of Mood and Anxiety Disorders, Neuroimaging, Endocannabinoid System and Cannabinoids.

The aim of the Fellowship is to provide excellent experience in clinical psychiatry, psychopharmacology, neurobiological and biomarker research, neuroimaging and clinical trials in Mood and Anxiety Disorders. The Fellow will develop excellent skills pertinent to the assessment and treatment of adults with mood and anxiety disorders, clinical research, novel neuroimaging approaches including Positron emission tomography (PET) imaging, and delivery of protocol-based interventions. This Fellowship will provide opportunity to work in multidisciplinary clinical and research teams, experience in scientific discovery, presentation and publication, various research methods and analytical approaches.

Candidates with an MD and completed residency training in psychiatry (eligible to practice medicine in Ontario (Canada)) with experience in Mood and Anxiety Disorders are encouraged to apply. Prior exposure to clinical trials is preferred. Applicants must have strong scientific writing skills. Individuals with a desire to pursue an academic career will be given priority. See CAMH website for information on research: <https://www.camh.ca/en/science-and-research/research-areas>

The expected duration of the Fellowship is 2 years. Salary will range from CAD \$50,000 - \$60,000 per annum, commensurate on experience.

Electronic applications, including CV, letter of interest, academic transcript, the e-mail addresses of two references, and copies of selected publications, should be sent to Dr. Stefan Kloiber stefan.kloiber@camh.ca, Centre for Addiction and Mental Health, 100 Stokes Street, Toronto, Ontario M6J 1H4, Canada.

Start date: Immediate

Duration: 2 years
